* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "B" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

I. Basis of the report

1. This report has been drawn up on the basis of *(Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.)*

☒ the international application as originally filed

☐ the description, pages , as originally filed
pages , filed with the demand
pages , filed with the letter of

☐ the claims, Nos. , as originally filed
Nos. , as amended under Article 19
Nos. , filed with the demand
Nos. , filed with the letter of

☐ the drawings, sheets / fig. , as originally filed
sheets / fig. , filed with the demand
sheets / fig. , filed with the letter of

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.
☐ the drawings, sheets / fig.

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2 (c)).

4. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty	Claims	1-21	YES
	Claims	None	NO
Inventive Step	Claims	1-21	YES
	Claims	None	NO
Industrial Applicability	Claims	1-21	YES
	Claims	None	NO

2. Citations and Explanations**1. Concerning Claim 1:**

- a) Claim 1 relates to a 3-phase traction motor.
- b) The purpose of the invention is to fit said motor with a high-voltage winding.
- c) Nearest prior art is Document DE-A-4 022 476 which discloses a high-voltage cable for a linear motor.
- d) Claim 1 discloses a high-voltage cable for a rotating motor, therefore the subject-matter of Claim 1 is new with respect to the state of the art in general and to DE'476 in particular (Article 33(2) PCT). Moreover, the installation of the cable according to DE'476 along a track is quite different than the winding of a rotating motor and consequently the man skilled in the art of motor would clearly not consider the teaching of DE'476. It then appears that the use of a cable according to DE'476 in a rotating traction motor is not obvious. Therefore Claim 1 also involves an inventive step (Article 33(3) PCT).

2. Concerning Claims 6 and 7:

Claims 6 and 7 relate to respectively a transformer and a rotating converter utilizing the same high-voltage cable as stated in Claim 1.

Therefore the subject-matter of Claims 6 and 7 is new and involves an inventive step.

3. Concerning Claims 2 to 5 and 8 to 21:

These claims are depending from independent Claim 1, 6 or 7 and disclose particular embodiments of the invention.

They are therefore to be considered as new and as involving an inventive step.

4. The industrial applicability of the motor and the drive system according to claims 1 to 21 is obvious.

VI. Certain documents cited

1. Certain published documents (Rule 70.10)

Application no. Patent No.	Publication date (day/month/year)	Filing date (day/month/year)	Priority date (valid claim) (day/month/year)
WO-A-9 745 288	04.12.97	27.05.97	29.05.96*
WO-A-9 745 847	04.12.97	27.05.97	29.05.96*

- * Although not belonging to the state of the art according to rule 64.1(b) PCT, these documents seem to disclose all the features of at least Claims 1, 6 and 7.

It has not been checked if the claimed priorities are valid.

2. Non-written disclosures (Rule 70.9)

Kind of non-written disclosure	Date of non-written disclosure (day/month/year)	Date of written disclosure referring to non-written disclosure (day/month/year)
--------------------------------	---	---

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

1. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document DE-A-4 022 476 is not mentioned in the description, nor is this document identified therein.
2. The features of the claim/s are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

1. It is clear from the description on page 3, lines 4 to 7; page 5, lines 6 to 11 and page 8, lines 1 to 6, that the following features are essential to the definition of the invention:

- (1) the motor can be directly connected to a high supply voltage up to between 10 and 800 kV (page 8 and Claim 21);

- (2) the motor is a rotating motor.

Since independent claims 1, 6 and 7 feature 1 and claim 1 (feature 2) do not contain these features it does not meet the requirement following from Article 6 PCT taken in combination with Rule 6.3(b) PCT that any independent claim must contain all the technical features essential to the definition of the invention.

2. The feature of claim 14 that the flux paths in the core of a magnetic circuit in the motor, transformer or rotating converter consists of laminated sheet plate and/or rough forged iron and/or cast iron and/or powder-based iron is not referred to in the description. Claim 14 is therefore not supported by the description as required by Article 6 PCT.

Applicant ASEA BROWN BOVERI AB et al.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 3 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☒ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

2

☐ None of the figures.
